MUHAMMAD SAAD

+1 6479840739 | muhammadsaadicup@gmail.com | LinkedIn | Google Scholar | Github | Portfolio

PROFESSIONAL SUMMARY

AI Engineer with 4+ years of experience building and deploying deep learning systems across vision, natural language processing (NLP), and interactive applications. Skilled in developing full-stack systems that integrate large language models into web-based 3D environments, enabling lifelike avatar interactions and domain-specific digital twins. Experienced in RAG pipeline implementation, real-time AI integration, and optimizing models for deployment across cloud and edge systems. Delivers impactful, research-driven solutions through scalable engineering and intelligent system design.

EDUCATION

Master of Applied Science (MASc), Electrical and Computer Engineering — **Ottawa, Canada**
University of Ottawa — *Sep 2025 – Present*

- **Thesis (In Progress)**: AI-Driven Embodied Agents for Real-Time Interaction in Immersive Virtual Environments.
- Research focuses on integrating large language models (LLMs), agentic reasoning, and multimodal perception into VR systems to enable adaptive, context-aware digital avatars.

Bachelor of Science, Software Engineering — **Peshawar, Pakistan**
Islamia College Peshawar (ICP) — *Aug 2017 – Sep 2021*

- Undergraduate research student supervised by Dr. Muhammad Sajjad and Dr. Jamil Ahmad.
- **Thesis**: "Visual explanation of deep learning-based breast cancer classification via gradient localization."
- **Major Courses**: Object-Oriented Programming (OOP), Data Structures and Algorithms, Software Architecture, Artificial Intelligence

PROFESSIONAL EXPERIENCE

AI Engineer — **Dubai, UAE**
HUMAIN (via EPAM Systems) — *Sep 2025 – Feb 2026*
Topics: Agentic AI, Voice cloner

- Collaborated on the AI-based Learning Path Generation system, recommending personalized courses within the Open edX platform based on user data and learning preferences.
- Built **Voice Cloner**, utilizing a pre-trained model for realistic speech generation, and extended its capabilities with concatenation techniques.
- Developed an AI-powered avatar system with real-time speech interaction, utilizing the Voice Cloner for speech generation to enable seamless avatar-driven communication.

AI Engineer & Researcher — **Abu Dhabi, UAE**
Metaverse Center, Mohamed Bin Zayed University of Artificial Intelligence — *Jan 2023 – Sep 2025*
Research topics: Digital twin, Metaverse, Violence Detection, LLMs for Interactive Avatars.

- Designed and launched **WudFlux**, a customized virtual learning platform built on Hubs, featuring full-body avatars, real-time lip-syncing, and sentiment-aware interaction for immersive web-based learning environments.
- Built **dTalk**, an AI-powered avatar system with expressive 3D animations and real-time lip-sync using Mixamo and Three.js, enabling LLM-driven, speech-based interaction (GitHub).
- Built expressive 3D avatar animations using Mixamo and enabled real-time lip-sync functionality through Three.js (GitHub).
- Created a React-based analytics dashboard for the Malaria No More (MnM) project, enabling live data visualization and streamlined decision-making.
- Developed a multimodal real-time violence detection system using LSTM, GRU, and Vision Transformer architectures on Jetson Nano at the Technology Innovation Institute (TII), improving inference performance for edge deployment.

AI Developer — **Peshawar, Pakistan**
Digital Image Processing (DIP) Lab Islamia College Peshawar — *Dec 2020 – 2022*
Research topics: Medical Imaging, Activity recognition, Facial emotion recognition (FER).

- Contributed to NTNU's facial emotion recognition module for ALAMEDA AI Toolkit.

- Built an automatic vehicle number plate detection system using deep learning and image processing techniques for real-time recognition and localization in traffic footage.
- Attention-Based CNN-LSTM, CNN-GRU, and Video Vision Transformer (ViViT) Models for Complex Activity Recognition in Cricket.
- Teaching assistant for Python programming course, helping students with programming concepts and practical lab assignments.

KEY PROJECTS

AI Systems & Production Applications 2021 – 2025

- **WudFlux Platform:** Immersive learning platform with sentiment-aware avatars and LLM-based interaction for educational environments.
- **dTalk System:** AI-powered avatar with speech interaction and real-time animations using Mixamo and Three.js.
- **Violence Detection:** Multimodal LSTM/GRU/ViT system deployed on Jetson Nano for edge surveillance.
- **ALAMEDA AI Toolkit:** Facial emotion recognition for neurological healthcare applications.
- **License Plate Detection:** Deep learning system for real-time vehicle recognition in traffic surveillance.

TECHNICAL SKILLS

- **Programming Languages:** Python, C++, MATLAB, JavaScript, HTML, CSS
- **Frameworks & Libraries:** PyTorch, TensorFlow, Scikit-learn, Keras, Hugging Face, LlamaIndex, OpenCV, NumPy, Pandas, Matplotlib
- **Deployment & MLOps:** Docker, Git, REST APIs, DigitalOcean, Weights & Biases
- **Computer Vision & Edge AI:** Vision Transformers (ViT), YOLOv5, LSTM/GRU, Siamese Networks, Jetson Nano, Model Optimization, Quantization
- **Web & 3D Development:** React, NodeJS, Three.js, A-Frame, WebSockets, Blender, Mixamo, Unity
- **Tools & IDEs:** PyCharm, VS Code, LaTeX

HONORS AND AWARDS

- Award of appreciation for securing 1st position in Youth Talent Expo *2020*
- Awarded with a Data Science certificate by the Government of Pakistan (NAVTTC) *2022*

LANGUAGES

- **English:** Fluent
- **Urdu:** Native speaker
- **Pashto:** Native speaker
